

THE DIFFERENCE IS DIAMONDS.

Delta® leads with another industry innovation: DIAMOND™ Seal Technology which combines a durable DIAMOND™ Valve with InnoFlex™ PEX waterways. The result: no leaks, no lead, no worries. Another way that Delta is more than just a faucet.

diamondsealtechnology.com

No Lead.

Once inside the faucet, water is not in contact with potential metal contaminants.

Simplified Installation.

Minimum of 32" integrated InnoFlex PEX waterways below the deck saves you the cost of additional supply lines. Everything is in the box.

No Leaks.

The threat of leaks is all but eliminated, thanks to the exclusive one-piece InnoFlex PEX supply lines, DIAMOND Valve and no dynamic seals.

No Worries.

The DIAMOND Valve features a disc embedded with real diamonds, so the valve is built to last up to ten times longer than the industry standard.

Industry standard based on ASME A112.18.1 of 500,000 cycles.
