Touch₂O._{xt}™ Technology

Convenience just got
even more convenient.

Touch it on. Touch it off. Or go
completely hands-free. With
Touch₂O._{xt} Technology, the choice
is yours. Available on our Addison®
and Lahara® models, you get
two great technologies in one
incredible faucet.

Tap it on. Tap it off.

Tap anywhere on the spout or handle to start the flow of water. If your hands are soapy or messy, simply use the back of your hand to turn on the water, which helps keep your faucet clean. Touch₂O[®] Technology is ideal for tasks that require a constant flow of water, such as washing your face or filling a glass of water.

Hands-Free Technology.

Your entire Touch₂O._{xt} Technology faucet acts as a sensor so the water starts flowing instantly and effortlessly. It senses your presence within 4", and the water automatically shuts off within seconds once you remove your hands from the sensing field. It not only helps conserve water, it's perfect for repetitive tasks like washing your hands or rinsing your razor.

Sometimes your hands could use a hand.
And Touch₂O._{xt} Technology is more than
happy to help.

Delta's exclusive DIAMOND™ Seal Technology uses a valve with a tough diamond coating so that your Touch₂O_{.xt}™ faucet lasts up to five million uses—plus it keeps water inside the faucet out of contact with potential metal contaminants. Proof that our faucets are just as beautiful on the inside.

Delta Touch₂O_{.xt} lavatories meet WaterSense requirements using 32% less* water, and they perform as well or better than their less efficient counterparts.

*Based on flow rate for lavatory faucets of 1.5 gpm versus Industry Standard ASME A112.18.1/CSA B125.1 of 2.2 gpm.

Delta® is committed to sustainability and providing smart water delivery solutions that maximize water savings without sacrificing comfort and convenience. Our commitment to sustainability extends to waste reduction and the preservation of natural resources and the environment. That's why we choose to print on Forest Stewardship Council (FSC) certified paper.

WaterSense® is a registered trademark of the U.S. Environmental Protection Agency.
